Data Analytics: Power BI, SQL Analytics, Dashboard Development, Data Aggregation, Metabase, Pandas
Tools & Technologies: Microsoft Azure (ADF, Synapse Analytics, ADLS Gen2), Amazon Web Services (AWS), GitHub, Alteryx, Microsoft Office

PROJECTS

PPG Industries Inventory Analytics Pipeline (Azure Data Factory, Azure Synapse Analytics, ADLS Gen2, Power BI) - Designed and implemented an end-to-end Azure data pipeline processing 6 inventory, supplier, production, and sales datasets using a 3-layer Medallion Architecture (Bronze, Silver, Gold) for inventory risk analytics. - Developed Azure Data Factory orchestration workflows and Synapse transformation pipelines to automate identification of Recoverable Assets (RA), Dead Stock, Expired Materials, and Stockout Risks. - Built a Galaxy Schema data warehouse with 2 fact tables and Power BI dashboards to deliver inventory visibility, financial exposure analysis, and customer order impact insights.

Brazilian Education Census ETL Pipeline (Apache Spark, PySpark, PostgreSQL, Docker)

- Built a scalable ETL pipeline using Apache Spark to process ~2.2GB of Brazilian Education Census data, converting raw CSV files into optimized Parquet format and loading them into a PostgreSQL Star Schema warehouse
- Developed PySpark transformation workflows and Metabase dashboards for enrollment trend analysis while containerizing the complete pipeline using Docker Compose

Customer Shopping Behavior Analysis (Python, MySQL, Power BI)

- Analyzed customer shopping data across 10+ SQL-based queries to uncover purchasing trends, customer segments, and revenue insights
- Developed interactive Power BI dashboards that translated raw data into actionable business recommendations for marketing and inventory strategy
